

About us

Organisation

Company was floated in the year 1990 with a humble strength of four young technocrats in a rental space of 300 sq. ft. with 5.0 H.P. power connection, manufacturing small reciprocating pumps. Due to customer's faith in us, product quality and constant upgradation of product features, we could launch number of innovative products in years to come.

Today, we have 11000 sq. ft. area in Asia's premier industrial estate in Ahmedabad. Out of which almost 5000 sq. ft. area has been allocated to manufacturing activity and 3000 sq. ft. area has been dedicated to office activity. Due attention has been paid to green surroundings. All processes are computerised for precision and speed.

Our Business Philosophy

We strongly believe in ultimate customer satisfaction, consistent quality, good H R practices and financial discipline.

Our Goal

Our goal is to become a global player in high pressure jetting system up to 2800 Kg/Cm² and 400 H.P. capacity. We want to grow through empowerment and transparency in our business dealings with our esteemed clients and suppliers.
