

## 5) HIGH PRESSURE HOSE PIPE

PressureJet supplies high strength, low weight erosion resistant hose pipe with swiveling end connection.

## 6) SECURITY VALVE

In the event of excess system pressure due to any reason, the security valve will open and will prevent any possible accident.

This valve is also known as pressure relief valve, safety valve or pressure regulating valve.

## 7) RIGID LANCE

Lances are used to maintain distance while cleaning.

## 8) FLEXIBLE LANCE

This is an important accessory for tube, pipe and sewer cleaning. They are available in different sizes and ratings.

## 9) PRESSURE GAUGE

A device to monitor the pressure at which the system works. PressureJet supplies glycerine filled pressure gauge, which is having very accurate pressure reading and very long life.

## 10) TROLLEY

Different trolleys are available as per client's requirement.

## 11) SUCTION STRAINER / FILTER

Suction strainer doesn't allow harmful tiny solid particles to come along with water. PressureJet has designed a **One Minute Clean** strainer, which is available in different Mesh sizes. It needs only **one minute** to be cleaned when it is choked up. PressureJet also supply large area filters for bigger pump.

## 12) NON RETURN VALVE (EXTERNAL)

This Non return valve is being used for specific hydro test application.
